

Multiplying Fractions by Wholes

Example:

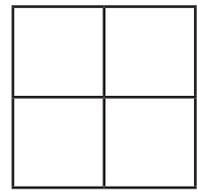

$$\frac{1}{3} \times 2 = \frac{2}{3}$$

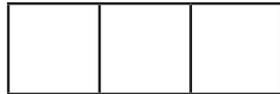

1. $\frac{1}{4} \times 2 =$

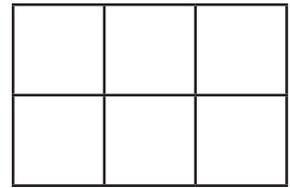

6. $\frac{1}{4} \times 3 =$

2. $\frac{1}{3} \times 3 =$

7. $\frac{1}{6} \times 5 =$

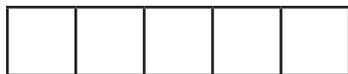

3. $\frac{1}{2} \times 2 =$

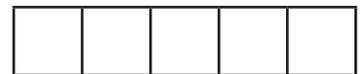

8. $\frac{1}{5} \times 2 =$

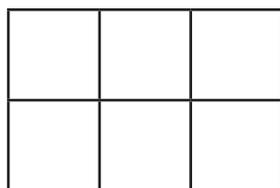

4. $\frac{1}{5} \times 4 =$

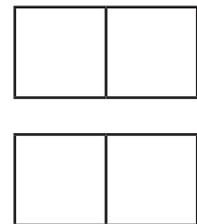

9. $\frac{1}{5} \times 3 =$

5. $\frac{1}{6} \times 2 =$

10. $\frac{1}{2} \times 4 =$

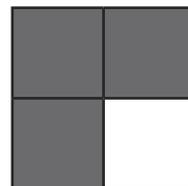

Multiplying Fractions by Wholes Answers

Example:

1. $\frac{1}{4} \times 2 = \frac{2}{4} = \frac{1}{2}$

6. $\frac{1}{4} \times 3 = \frac{3}{4}$

2. $\frac{1}{3} \times 3 = \frac{3}{3} = 1$

7. $\frac{1}{6} \times 5 = \frac{5}{6}$

3. $\frac{1}{2} \times 2 = \frac{2}{2} = 1$

8. $\frac{1}{5} \times 2 = \frac{2}{5}$

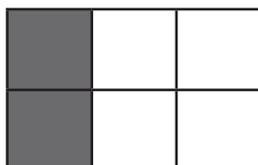

4. $\frac{1}{5} \times 4 = \frac{4}{5}$

9. $\frac{1}{5} \times 3 = \frac{3}{5}$

5. $\frac{1}{6} \times 2 = \frac{2}{6} = \frac{1}{3}$

10. $\frac{1}{2} \times 4 = \frac{4}{2} = 2$
