

"Mathematics is a creative and highly inter-connected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject."

National Curriculum in England 2014

Department for Education

This calculation policy is a guide for all staff at Ludlow Primary School and forms part of the mathematics policy.

It is designed to be used alongside any teaching resources that teachers wish to use.

All staff have access to Maths-No Problem resources which provides lessons and a host of ideas and activities to develop mastery in Mathematics. These resources are excellent ways to support the learning of mathematics and should be tailored to support the needs of the pupils. Staff are also encouraged to access the NCETM and White Rose Websites for further ideas and guidance. In EYFS, Development Matters statements are referred to; to inform planning and progress towards meeting the Early Learning Goals:

All teachers have access to the schemes of work from the White Rose Maths Hub. This module also uses the Singapore Maths Methods and is affiliated to the workings of the New Mathematics Curriculum that is running throughout the school. Where appropriate, staff are encouraged to base their planning around these recommended modules. However, it should be emphasised that all planning should take account of the requirements of the pupils in terms of where they are in their learning and how they can achieve successful outcomes. Teachers are responsible for making these judgements.

The White Rose Maths schemes of work provide sequential programmes of study that are underpinned by promoting fluency in number. They emphasise that all pupils must have a thorough grounding in the four basic rules of number before progressing on to the next level. This complete understanding gives pupils more confidence in dealing with number activities and in turn, leads to mastery of the four operations.

Whilst the calculation policy guidance document is separated into year group phases, these are intended to be used only as a guide and it is the teachers' professional judgement as to when the pupils move on to the next phase.

Subtraction Progression

| Objectives | Concrete | Pictorial | Abstract |
|--|---|---|--|
| and strategies | | | |
| Subtraction as take away | Physically taking away Tractor pull | Image: Weight of the second | 4 take away 2 makes 4 – 2 = |
| | Ten Frame | | |
| Saying which number is one less than a given number | Physically removing one item "Yum" | U U U U Crossing out one | 4 take away 1 makes 1 less than 4 is 1 fewer than 4 is |

| Subtracting | 2 | | 9 - 4 = |
|---------------------|--|---|--|
| digit numbers | ABBBBB | Counting back on number line | Put larger number in head and count back |
| by counting back | Physical number line | | |
| Taking away ones | Use physical objects, counters, cubes etc to show how objects can be taken away. 6-4=2 | Cross out drawn objects to show what has been taken away. | 7 - 4 = 3 6 = 8 - 2 18 - 3 = 15 |
| | Ten Frame | 15 - 3 = 12 | |
| | | $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ | |

| Counting back | Move objects away from the group, counting backwards. | Count back in ones using a number line. | Put 13 in your head, count back 4. What number are you at? |
|---------------------|--|---|--|
| | | 5 - 3 = 2 | |
| | Make the larger number in your subtraction. Move the beads along the bead string as you count backwards in ones. | This can progress all the way to counting back using two 2 digit numbers. | |
| | | -1 -1 -1 34 35 36 37 47 57 | |
| | Obsecute | | |
| Find the difference | Compare amounts and objects to find the difference. | Count on using a number line to find the difference. | Hannah has 23 sweets. Her sister has 15 sweets. Find the difference between the number of sweets. |
| | Use cubes to build towers or make bars to find the difference | | Ben has 12 marbles, and his brother has 5. How many more marbles does Ben have than his brother? |
| | Use basic bar models with items to find the difference | | |

| | | Draw bars to find the difference between 2 numbers. | |
|---------------------|---|---|--|
| Part Whole Model | Link to addition – use the part whole model to help explain the inverse between addition and subtraction. If 10 is the whole and 6 is one of the parts. What is the other part? 10 - 6 = | Use a pictorial representation of objects to show the part whole model. | Move to using numbers within the part whole model. |
| Make 10 | 14 – 5 Make 14 on the ten frame. We will partition the 5. Take away the 4 first to make 10 and then take away 1 more so you have taken away 5. | Use a number line. 13 – 7 = Start at 13. Partition the 7 into a 3 and a 4 so can take away 3 to reach 10. Then take away the remaining 4 so you have taken away 7 altogether. | 16 - 8 = Partition the 8. How many do we take off to reach the next 10? How many do we have left to take off? |

| | | 13 - 7 = 6 3 4 -4 -3 -3 -4 -3 -5 -4 -4 -3 -5 -4 -4 -3 -5 -4 -4 -3 -5 -4 -4 -3 -5 -4 -4 -4 -5 -4 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -4 -5 -4 -5 -4 -4 -5 -4 -5 | |
|---|--|--|---|
| Column method without regrouping | Use the base 10 equipment to make the bigger number then take the smaller number away. | Draw the Base 10 or place value counters alongside the written calculation to support understanding. 544 -22 32 | Intermediate step of partitioning. $47-24=23$ $-\frac{40+7}{20+3}$ |
| | Show how you partition numbers to subtract. Again make the larger number first. | Image: Constraint of the second se | This will lead to a clear written column subtraction. T 0 32 -12 20 |

Multiplication Vocabulary

Division progression

| Objectives and | Concrete | Pictorial | Abstract |
|----------------|--|------------------------------------|--------------------|
| strategies | | | |
| Problem | 11 | | Half of 8 is |
| solving - | Er | | |
| halving | | loo ec | What is half of 8? |
| | | | |
| | I have 4 pencils. I give half of these pencils to a | Cross off half of the holes on the | |
| | friend. | Numicon. How many holes are left? | |
| | | | |
| | half? | | |
| | | | |
| | | | |
| | | | |

| Problem solving - sharing | Share these 6 pears between 3 children in the class. | Show how these marbles can be shared between two children | What is 8 shared between 2? Ben has eight marbles and he wants to share them equally with his friend, Sam. How many marbles to they get each? |
|-----------------------------------|--|--|--|
| Sharing objects into groups | I have 10 cubes. Can you share them equally into 2 groups? | Children use pictures or shapes to share quantities. Children use pictures or shapes to share quantities. 3 + 2 = 4 Sharing: 4 + 2 = 4 12 shared between 3 is 4 | Share 9 sweets between 3 children 9 ÷ 3 = 3 |

| | | Children use bar modelling to show and support understanding. | |
|-------------------------|---|---|--|
| Division as grouping | Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding. | Use a number line to show jumps in groups. The number of jumps equals the number of groups. 0 1 2 3 4 5 6 7 8 9 10 11 12 1 3 3 3 3 3 Think of the bar as a whole. Split it into the number of groups you are dividing by and work out how many would be within each group. 20 $20 \div 5 = ?$ $5 \times 2 = 20$ | 28 ÷ 7 = 4 Divide 28 into 7 groups. How many are in each group? |

| | Use the Base Ten equipment or place value counters: 24 divided into groups of $6 = 4$ 96 ÷ 3 = 32 | | |
|--------------------------|---|--|--|
| Division with arrays. | Link division to multiplication by creating an array and thinking about the number sentences that can be created. $\boxed{\texttt{Eg 15} \div 3 = 5 \qquad 5 \times 3 = 15 \\ 15 \div 5 = 3 \qquad 3 \times 5 = 15 \\ \end{bmatrix}$ | Draw an array and use lines to split the array into groups to make multiplication and division sentences. | Find the inverse of multiplictaion and division sentences by creating four linking family number sentences. 7 x 4 = 28 4 x 7 = 28 28 ÷ 7 = 4 28 ÷ 4 = 7 |

| | We regroup this ten for ten ones and then share the ones equally among the groups. | | $ \begin{array}{cccccccccccccccccccccccccccccccccccc$ |
|---------------|---|--|--|
| Long Division | Immetrie 2544 ÷ 12 How many groups of 12 thousands do we have? None None Regroup 2 thousands for 20 hundreds. | Instead of using physical counters, students can draw the counters and circle the groups on a whiteboard or in their books. Use this method to explain what is happening and as soon as they have understood what move on to the abstract method as this can be a time consuming process. | $ \begin{array}{c} 0 & 3 & 1 & 8 & r \\ 20 & 6 & 3 & 6 & 5 \\ & -6 & 0 & \bullet \\ & -3 & 6 & \bullet \\ & -3 & 6 & \bullet \\ & -3 & 6 & \bullet \\ & -1 & 6 & 5 \\ & 1 & 6 & 0 \\ & 5 & 5 \\ \end{array} $ |
